

SEEN IRIS-i Smart Camera

Under development due February 2022

What it is

IRIS-i is SEEN's new IoT camera that uploads IRIS 860 detection information to SEEN's online data platform..

How it works

IRIS-i plugs into an IRIS 860 sensor and seamlessly connects to the Cloud via the 3G/4G mobile data network. No IT integration or technical installation required.

Analytics

SEEN Analytics captures quantifiable data about high risk machine-pedestrian interactions. Low fixed-cost subscription per camera.

Event data

- Still image
- Detection trace
- Closest distance
- Duration
- Time & date
- Machine and sensor ID

Other features

- On-demand detection event video
- 12 hour rolling video loop
- Secure data transfer
- Enables remote sensor settings updates
- IP-67 suitable for outdoor use

Designed with SEEN's Simple, Effective, Affordable philosophy in mind. For more information contact info@seensafety.com
